EXPERIENCE

Analyst / Full Stack Developer

Capgemini Technology Services India Ltd

(Feb/24 - Present)

- Contributed to the maintenance and incremental enhancement of an **internal employee-facing application**, utilizing **SQL queries** to manage data updates and ensure reliability in a production environment.
- Collaborated with cross-functional teams to troubleshoot and resolve **production issues**, implementing controlled bug fixes and minor feature updates while maintaining proper documentation.

Freelance Website Developer

Horizon Ventures Pvt Ltd -

(Sep/23 - Jan/24)

- Developed and deployed a **responsive SPA** using **React.js** for an Environmental Consulting firm, showcasing their services with smooth navigation and clean UI/UX.
- Handled the project **end-to-end** — from requirements to deployment — with **reusable components**, **cross-device compatibility**, and **Basic SEO**.

PROJECTS

WhisprBill – AI-Powered Invoice Automation SaaS |

MERN Stack, Next.js, Github Actions, AWS

[\(Live\)](#) [\(Github\)](#)

- Architected and implemented the **frontend for a production-grade AI-powered SaaS platform**, designing scalable invoice workflows and real-time preview systems.
- Built complete landing page using Next.js (SSG) with chatbot and complete SEO
- Collaborated on **backend architecture decisions**, contributing to **JWT-based authentication**, secure **token refresh lifecycle**, and session management.
- Implemented **LLM-driven invoice generation workflows**, integrating **MongoDB persistence**, API orchestration, and draft-to-final state transitions.
- Designed and integrated **subscription-based feature gating and AI usage limits**, connected to **Razorpay payment gateway**.
- Built dynamic invoice templates using **Handlebars** and automated **PDF generation via Puppeteer**.
- Contributed to **containerized cloud deployment** using **Docker, AWS EC2, Amazon ECR**, and automated releases via **GitHub Actions CI/CD**, while managing frontend hosting on **Netlify and Vercel**.
- Designed system with infrastructure considerations for scaling PDF generation via background processing and instance scaling.

GenMail – AI Email Assistant (Web + Chrome Extension) |

Spring Boot, React, Gemini API

[\(Github\)](#) [\(System Design Doc\)](#)

- **Developed** a full-stack AI email assistant with both web and Chrome extension interfaces, enabling users to generate **context-aware email replies** directly **within Gmail**.
- Engineered **dynamic UI injection** beside Gmail's native "Send" button using Chrome Manifest V3 and content scripts, **ensuring** seamless integration without disrupting user workflow.
- Integrated **Gemini LLM** via Spring Boot backend to fetch, clean, and **inject ready-to-send** replies into the Gmail compose box, **reducing** email response time **by up to 80%** and saving **~3+ hours/month** for regular users.

TECHNICAL SKILLS

FRONTEND

React.js, Redux, React Router, TailwindCSS

BACKEND

Node.js, Express.js, Spring Boot

DATABASES

MongoDB • MySQL • Firebase

CLOUD and DevOps

AWS (EC2, ECR), Docker, GitHub Actions

EDUCATION

B. Tech in Computer Science Engineering

PRESIDENCY UNIVERSITY

CGPA: 7.67

Aug 2019 – Jul 2023

12th Standard

Seshadripuram PU College(Main)

May 2017 - Mar 2019

78%
